Resources About Plan B One-Step™/2

Important Safety Information

Plan B One-Step™ (levonorgestrel) is intended to prevent pregnancy after known or suspected contraceptive failure or unprotected intercourse.

Plan B One-Step™ isn't effective if you're already pregnant, and it won't terminate an existing pregnancy. Plan B One-Step™ does not protect against HIV and other sexually transmitted diseases (STDs). Side effects may include changes in your period, nausea, lower abdominal pain, fatigue, headache, and dizziness. If your period is more than a week late, you may be pregnant. You should not take Plan B One-Step™ if you are already pregnant. Plan B One-Step™ should not be used as a routine birth control, as it is not as effective. If you have severe abdominal pain, you may have an ectopic pregnancy, and should get immediate medical help.

You are encouraged to report negative side effects of prescription drugs to the FDA at fda.gov/medwatch or call 1-800-FDA-1088. Please see full product information enclosed. Important product information is available on www.PlanBOneStep.com, by calling 1-800-330-1271, or by speaking to your pharmacist.

Plan B One-Step™ is a trademark of Women's Capital Corporation.
